PROFILE

I hold a Bachelor's Degree in Computer Science and build digital products end to end — interfaces, APIs, data, and integrations between software and hardware.

My edge is connecting engineering, artificial intelligence, and product thinking. Technology is the means; clarity, usability, and real impact remain the outcome.

LANGUAGES

Portuguese
NATIVE

English
ADVANCED

Spanish
INTERMEDIATE

TECHNICAL SKILLS

AI, Data & Algorithms

Technical foundation and practical application

Machine Learning · Deep Learning · Neural Networks · Algorithms · Data Processing · LLMs · Automation

Backend & Integration

Node.js · Supabase · PostgreSQL · REST APIs · Auth & RLS · Systems Integration

Web Frontend

React · TypeScript · Vite · Tailwind CSS · Framer Motion

Mobile & IoT

Flutter · Cross-platform Apps · Android / iOS · Mobile UI · IoT · Software + Hardware

EDUCATION

Bachelor's Degree in Computer Science

PROFESSIONAL TRAJECTORY

Jul 2026 — present

Full Stack Developer

Grupo Pensar · Full-time

Full stack development of digital products — from frontend to backend, integrating data, APIs and services.

Technologies and topics: React · TypeScript · Node.js

Current

Entrepreneur

NexFest · Startup

Conception and development of an event-services marketplace — from product and frontend to backend architecture and the protected payments flow.

Technologies and topics: React · Marketplace · Payments · Product

---

Academic

Research & Development

SunSense Smart · Award-winning project

IoT system awarded a silver medal at an international science fair, combining software, hardware and environmental data collection.

Technologies and topics: IoT · Data · Hardware

Education

B.Sc. in Computer Science

Computer Science · Education

A solid foundation in algorithms, data structures, software engineering and the fundamentals of artificial intelligence.

SELECTED PROJECTS

NEXFEST

An event-services marketplace: it connects organizers to pitmasters, bartenders, DJs, and waiters available on the date, with search, booking, and protected escrow payments. A two-sided product built from frontend to payments.

Technologies and topics: React · Marketplace · Payments · Startup

SUNSENSE SMART

An academic project awarded a silver medal at an international science fair. It focuses on IoT, intelligent monitoring, data collection, and software-hardware integration.

Technologies and topics: React · IoT · Data · Automation

KEEPEDU

team participation

An educational management platform for schools, connecting staff, students and families. I took part in the team, working on the new frontend architecture and on SSO and centralized authorization and permissions.

Technologies and topics: Frontend · SSO · Authorization · Permissions

SERENNIA - BEAUTY MANAGEMENT

A complete beauty salon management system with scheduling, service orders, financial control, and customer management in an operations-focused SaaS application.

Technologies and topics: React · SaaS · Management · Data
